**To connect to the Reddit Diablo 2 Community Server:**

Step 1: Have Diablo II: Lord of Destruction installed
(using legit or generated cd-key since it's a private server)

**Step 2: Download the Battle.net Gateway Editor at:**
http://www.mediafire.com/?af3ddb2lz9xzbap

Step 3: Open the editor, click
on "Diablo2/Diablo2Exp"
tab at the bottom, then
"Add Gateway"

Step 4: Enter the server info as shown

Note that if you have a legit copy of Diablo II,
this will NOT impact your ability to log onto
regular battle.net. It only adds the Reddit Server
to your available list of realms to choose from.

Step 5: Start up Diablo II normally, select the Slash Diablo realm.
Make sure you make a ladder character!
